

Dear STEM Night Participant,

St. Mary's Catholic School in Sherman will be hosting our first ever STEM night on Friday October 26th, from 6-8pm, in our school gymnasium. We are currently in the planning stages and are reaching out to our local talent for participation in this fun event, and that means YOU!

Our goals for the evening are to spark an interest in **Science, Technology, Engineering, Arts** and **Mathematics**, for not only our school families, but the entire Texoma community, and we are certain that can be done with your participation. We are planning team challenges, individual challenges, food truck snacks, giveaways and amazing vendor participation. This will be the first event of this type in Sherman and we anticipate it will be well received, as the excitement has already begun among our students and school families.

There will be no charge or admission for our participants and guests, and we hope you will join us with interactive projects or presentations to "wow" those in attendance, as this is an ideal setting to present your organization's **STEM** related products and services to an enthusiastic crowd.

We have a few questions regarding your needs for the evening, as we wish to accommodate your requests.

1. What is the name of your organization? (If you so desire, please provide your organization's logo in jpeg format)
2. Who is the contact person? Please provide a name, email address and phone number.
3. Do you need more than one table?
4. Do you need a power outlet for your table or display? How many?
5. Are you able to provide extension cords or do you need one?
6. Do you wish us to provide a tablecloth?
7. What activities do you have planned? Briefly describe...
8. Do you need extra space for your presentation or display?

Please respond by Friday, October 14th, via regular mail or email.

We at St. Mary's look forward to working with you for this evening and in the future. Please feel free to call or email us with any questions.
